WORK EXPERIENCE

Rai Tech Inc, Toronto, Ontario

Mar 2025 – present

Front-End Developer & Community Engagement

- Led the development of AIStore's frontend using **React**, **Vite**, and **Tailwind CSS**, improving page load performance by **30%** and presenting complex agent infrastructure in a clear, accessible way for developers.
- Redesigned the **Railtech.io** website with a **mobile-first approach**, improving SEO and lighthouse optimization scores from **30% to 97%**, significantly enhancing site performance and discoverability.
- Managed **Railtech's LinkedIn, Twitter, and Discord developer community**, focusing on growing a developer-focused audience and actively reaching out to similar projects, communities, and contributors to increase engagement and visibility.
- Published technical and update blog segments on **Railtech** pages to boost optimization factors and maintain consistent engagement with the target developer audience

George Brown College, Toronto, Canada

Sep 2024 – April 2025

IT support Assistant

- Provided technical support to students for school systems including **Stu-View**, **Brightspace**, and **Microsoft 365**, resolving 10–15 tickets per shift on average.
 - Assisted in **early user testing and feedback collection** for updates to the Stu-View web portal, helping improve student-facing functionality before full rollout.
 - Helped troubleshoot Wi-Fi access, login issues, and school app performance on student laptops and mobile devices.
 - Delivered step-by-step technical guidance to non-technical users and documented recurring issues for escalation, helping streamline campus IT support workflows.
-

PROJECTS

AIStore – Developer Dashboard for Secure Agent Infrastructure

React, Vite, Tailwind CSS, Swagger docs

- Built and maintained the frontend interface for AIStore, focusing on clean design and intuitive navigation to simplify access to secure agent execution pods.
- Collaborated with backend and infrastructure teams to streamline frontend integration, helping reduce development latency and enable faster feature rollout.
- Participated in QA and usability testing during early development phases, identifying UI issues and contributing to interface improvements.
- Created internal documentation, including **API endpoint references** and **developer starter guides**, to improve accessibility and onboarding for other team members.

Hire-a-Chef – Catering Service Web Application (Capstone Project)

Sep 2024 – April 2025

React, Firebase, Tailwind CSS

- Built key frontend components for a responsive web app that connects users with local chefs for custom catering bookings, with real-time updates powered by **Firebase**.
 - Worked in a collaborative, sprint-based team environment, adapting to feedback and change requests during weekly reviews to improve user experience and feature performance.
 - Contributed to code reviews, version control, and UI consistency across components, ensuring smooth team workflow and on-time MVP delivery.
 - Focused on clean design and mobile-first responsiveness to enhance accessibility and usability across devices.
-

EDUCATION

George Brown College, Toronto, Canada

Sep 2022 – April 2025

Advanced Diploma - Computer Programming and Analysis

CERTIFICATIONS AND KEY SKILLS

Certifications: IT essentials, Scrum Fundamentals, Github Foundations

Tools: Git & GitHub • Docker • Figma • EasyVista • Cisco Jabber • Google Workspace • Microsoft 365 • Slack

Technical Skills: • React • Vite • Tailwind CSS • HTML5 • Manual UI testing • usability feedback • Mobile-first UI/UX design • Firebase • MongoDB • PostgreSQL • REST API • Sprint planning • CMS familiarity • Bug reporting

Soft Skills: Communication • Problem-Solving & Critical Thinking • Organizational Skills • Time Management

• Attention to Detail • Team Collaboration • Adaptability & Flexibility
